

SUPERSTORE SALES & FINANCIAL PERFORMANCE

Dashboard Design – Submission Report

Prepared for: Business Intelligence / Internship Dashboard Task

KPI	Value
Total Sales	\$2,207,388.15
Available Profit	\$62,561.75
Total Quantity	36,496
Profit Margin	2.83%
Records	9,984

1. Dashboard Components

- KPI cards: Total Sales, Available Profit, Total Quantity and Profit Margin.
- Slicers: Category, Region and Segment.
- Sales by Region chart.
- Sales by Category chart.
- Sales by Segment chart.
- Profit by Category chart.
- Sub-Category performance table.

2. Regional Performance

Region	Sales
West	\$722,243.21
East	\$592,194.13
Central	\$501,239.89
South	\$391,710.92

3. Category Performance

Category	Sales	Profit
Technology	\$813,992.47	\$55,735.38
Furniture	\$732,372.57	\$6,826.37
Office Supplies	\$661,023.12	\$0.00

4. Key Business Insights

- West is the largest sales region with approximately \$722,243 in sales.
- Technology is the highest-sales category with approximately \$813,992.
- The cleaned dataset contains 9,984 parsed records.
- Profit is populated for 1,917 records; missing values limit the reliability of profitability KPIs.
- The source file has no Order Date, so genuine monthly/quarterly growth analysis cannot be calculated from this exact file.

5. Conclusion

The proposed Power BI dashboard provides stakeholders with an interactive view of sales, profit, quantity, region, category and segment performance. Slicers enable users to investigate performance from different business perspectives. The dashboard should be refreshed with the complete original source data before final financial decisions are made.
